Aumi Tao - Vision Statement

Serving humanity through connection, raising consciousness and promoting health & well-being.

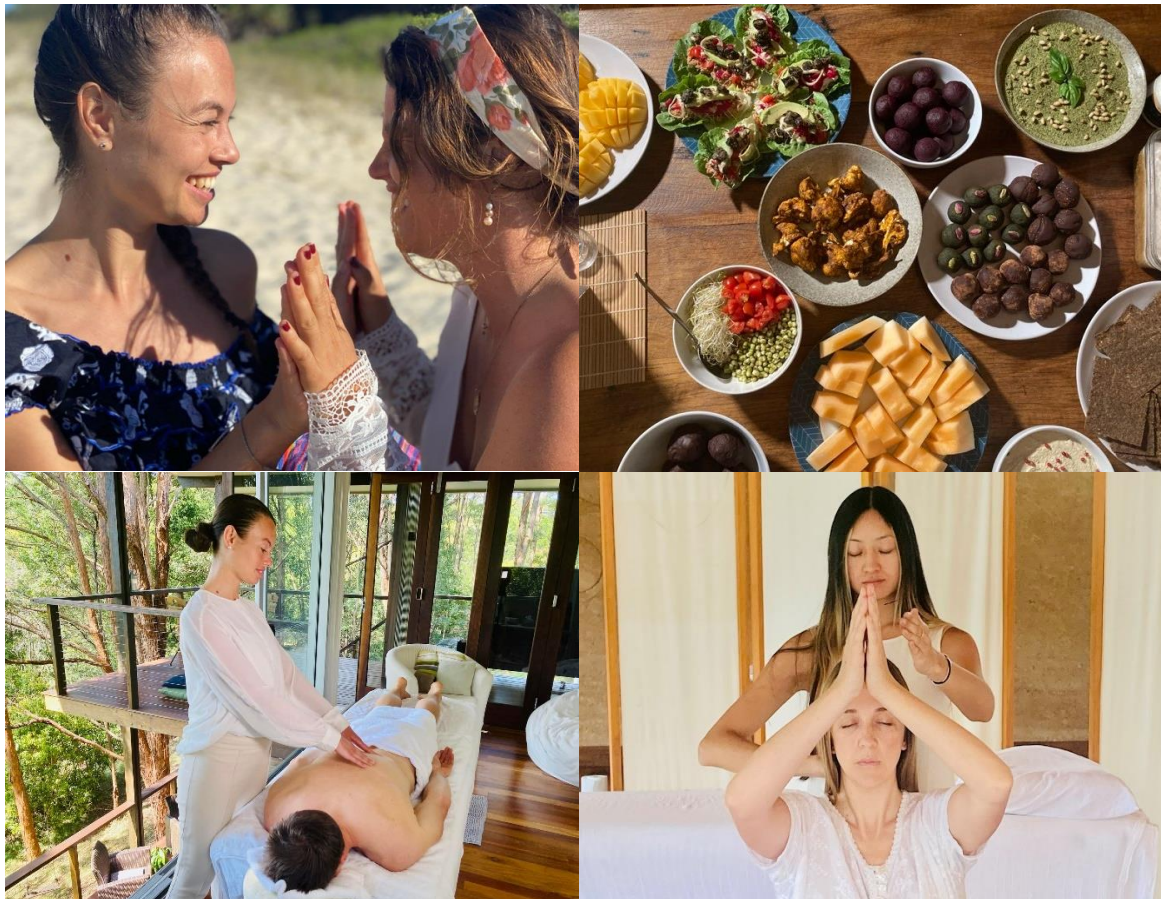

We are community that supports a lifestyle of our pure nature, creating a positive evolution and living from the heart.

We support every individual to be the greatest best version of themselves, to reach their full potential and fulfill their purpose.

Our heart base will be presented and integrated worldwide.

The services and products of Aumi Tao will be shared and promoted to all, an inclusive offering to humanity.

We share nature's wisdom in food, drinks, conscious products, ceremonies, workshops, health treatments and much more!

Aumi Tao - Call to Action

Aumi Tao is the unfolding of a movement. A movement to raise human consciousness through being of service to humanity.

"Aum" is the creative vibration of the universe, it is through this vibration that all things are manifested. It can be heard at all times when you are attuned to listen to it – it is all matter, all energy, all things.

"Tao" is the natural order of the universe. To perceive this natural order and align one's will to it is to be in harmony with the universe - it is the way, it is the path.

By combining Aum and Tao, the creative vibration of the universe is aligned with the natural order - grounded and at the same time connected to the divine.

The "I" in the middle between "Aum" and "Tao" is the connection between the two, it is the choice we all make as individuals to align with the natural order of the universe to create a higher vibration.

The "I" of illusion:

The "I" is also a symmetrical representation of what can hold us back. We live in the age of "I's" - the age of the internet, the age of information, the dawning of the age of artificial intelligence and, most importantly, the age of the individual illusion separated from the whole.

The age of information provides a hyperdrive of data, of self-perpetuating ever-increasing opinion that floods our minds. The flood is overwhelming and, in some cases, absolute, carrying away the fertile soil of our intuition. It provides the illusions of intelligence – the shiny veneer of knowledge not experienced but regurgitated. With the flood of information, we build dams to solidify us as individuals separate from the whole. We desire and celebrate the wave that rises above the ocean and says look at me! The 'I' that forgets that we are all part of the same ocean, the connected sea of awareness.

The "I" of truth

The 'I' that connects Aum and Tao is the 'I' of connection, the 'I' that harnesses the information we are blessed with to raise the individual consciousness and in doing so raise the collective consciousness. The 'I' that knows that the wave is a beautiful manifestation of the wind on the ocean - created not separated.

From this 'I', it is about being of service - not what I can get from the world but what I can give to the world. The human mission for all of us is to raise the collective consciousness. It starts with raising our own consciousness and being of service.

This is where you step in as the 'I' that can decide. To make a decision based on courage, the courage to look inward to find the answers, not the answers based on conditioning or programming, the answers based on the courage to let go of everything that separates us from the divine and, ultimately from each other.

As the 'I' we all have unique gifts to share on this collective mission. Aumi Tao is a bridge to share those gifts.

Being of service in sharing our unique gifts, co-creating with community, in harmony with the natural order of the universe to raise the collective consciousness - this is Aumi Tao.

Aumi Tao - Sharing your Gifts

1. What is your vision?
2. What is your role (mission) with respect to that vision?
3. What values and beliefs motivate you to take on that role & vision?
4. What capabilities are necessary to reach the vision and stay consistent with your beliefs and vision?
5. What action steps will you take in order to reach your vision?
6. What environmental opportunities and constraints will you have to take advantage of or contend with in order to reach your vision?
